REGULATORY AND QUALITY CONTROL POLICY

At ALEATICA we are committed to high quality and continually pursue it, meeting the needs and exceeding the expectations of our customers and users by providing a safe and reliable service through a Quality Management System that guides and controls the correct use of our resources, fostering the continual improvement of our operations.

The principles that guide us are:

- Comply with legal, regulatory, and technical requirements applicable to all our operations.
- Keep our understanding of the needs of our customers up to date and provide a safe service that exceeds their expectations.
- Foster the continuous improvement of our operations through efficient functioning.
- Promote a culture of high quality through the participation of all our workers in process improvement trainings, by considering it an essential aspect to achieve objectives.

To operate based on the principles described above, at ALEATICA we have assumed the following commitments:

- Implement a Normative System in ALEATICA that is comprised of the following elements: Code of Ethics, Policies, Norms and Processes.
- Establish the process for updating and approving all aspects of the normative, involving the Corporate Governance Bodies.
- Communicate and provide information of the Normative System to facilitate understanding and implementation of best practices in our operations.
- Maintain and continually improve a Quality Management System, including the aspects of the Normative System and their interactions.
- Foster knowledge of the Quality Management System through training and by encouraging worker participation in development of the processes.
- Execute audits to verify the adherence to the policies, norms and process approved, as well as capture the learnings to develop improvements.
