## WASTE POLICY

ALEATICA is committed to reducing its ecological footprint and impact on the environment and that is why we have developed guidelines for Comprehensive Waste Management aimed at the minimization, leveraging, recovery and controlled final disposal of our waste, in compliance with the principles and commitments set forth in the ALEATICA Sustainability Policy.

ALEATICA's guiding principles are:

- a. Establish the Integral Management of Non-hazardous Waste or any characteristic of Dangerousness in the Business Units to prevent pollution.
- b. Establish mechanisms for minimization at the source and increase the rational leveraging of the waste generated.

To operate by the above mentioned principles, ALEATICA will over time assume the following commitments:

1. Comply with the applicable local regulations and the indicators of international sustainability standards and frameworks, reported in the Non-Financial Annual Report of ALEATICA -Spain Law 11/2018, Global Reporting Initiative (GRI), Sustainability Accounting Standards Board (SASB), Global Real Estate Sustainability Benchmark (GRESB) and Task Force on Climate-related Financial Disclosures (TCFD).
2. Create a culture of environmental responsibility in all ALEATICA collaborators through training and awareness, promoting the prevention and minimization of waste generation for the waste generated within the company.
3. Classify the types of waste generated by ALEATICA for the identification and control of the sources of generation, quantification and analysis of the type of disposal, as well as the establishment of objectives for minimization, use and recovery.
4. Foster participation and responsibility among workers with respect to comprehensive waste management.
5. Promote the creation of alliances with suppliers and organizations that help with the recovery or controlled final disposal of the waste.
6. Encourage the collaboration of all areas of ALEATICA to develop programs and strategies that make it possible to minimize, take advantage of and valorise the waste generated.
